

Community Environmental Health Priorities – City of Rochester

Housing quality and environmental exposures

Difficulty accessing resources due to the built environment

Inequities in environmental exposures and access to resources (Environmental Justice)

Greenspace and urban tree canopy

Heat (indoor, outdoor, and occupational exposure)

Legacy pollution (brownfields, hazardous waste, contaminated soil)

Outdoor air quality

Drinking water quality

Water infrastructure and flooding

Overarching themes:

- **Climate change** impacts many environmental health issues
- **Social determinants of health** - such as safe neighborhoods, access to healthcare, education, violence, and poverty - interact with these issues
- **Environmental justice**

Suggested solutions:

- Workforce development
- Information and education
- Policy change
