

Division of Strategic National Stockpile County Staging Site (CSS) Course

An interactive and engaging training experience!

Course Objectives:

At course completion, participants will:

- Setup and configure the CSS warehouse
- Receive new inventory
- Place product in the correct locations (Putaway)
- Select products to fill customer orders (Picking)
- Organize orders for staging and shipping
- Describe ways to enhance warehouse throughput
- List key forms and paperwork

Through a collection of presentations, group activities, practical exercises and supporting materials, this two-day course will train participants to effectively organize and operate a CSS warehouse to respond to a public health emergency.

Course Goals: Participants will learn the roles and responsibilities of CSS warehouse workers and will demonstrate selected CSS tasks.
