

## Evacuation of Facilities in Disaster System (eFINDS) Train the Trainer (TtT) HPP Deliverable 4

### Background

eFINDS is a tracking system/application on the Health Commerce System (HCS) that should be used by a healthcare facility in the event of an emergent, urgent or planned evacuation. The application captures minimal amounts of data and allows facilities to track the evacuee movement to other facilities, facility types or temporary shelters.

Hospitals that need to build capacity or need to replace an eFINDS facility-based trainer who can no longer fulfill this responsibility should send a staff person to this training.

This course meets the requirements of 2019-2020 Hospital Preparedness Program Deliverable 4 and Deliverable 12.

### Pre-Requisite

[Completion of the CTI-502 eFINDS webinar training which can be found on the LMS by searching course catalog for CTI-502.](#)

### Target Audience

Facility trainers / educators, Emergency Management Coordinator, Facilities Management Personnel and/or those staff members who may be involved with logistics and planning for a hospital evacuation.
