

# **VISITOR RESTRICTIONS EFFECTIVE IMMEDIATELY**

## **Please help us protect our patients against influenza.**

**We carefully monitor flu activity levels in our hospital and the community. When certain thresholds are met, we must take action to halt the spread and limit the number of visitors allowed in our patient areas.**

- No more than three (3) visitors with a patient at a time**
- No visitors under the age of 14 (EXCEPTION: In the Maternity Unit ONLY, healthy siblings of any age are permitted to visit healthy newborns.)**
- No visitors with symptoms of fever, cough, body aches, or a sore throat**

**Questions?** Please contact the Infection Preventionist, the Administrative Coordinator, the Chief Nursing Officer, or designee (i.e., Unit Manager or Charge Nurse).

**Once flu activity subsides, visitor restrictions will be lifted. Until then, we appreciate your cooperation and commitment to keeping our patients safe.**
