

## **CMSR Trainee Receives People's Choice Award at the 2017 Three Minute Thesis (3MT) Competition**

The Three Minute Thesis (3MT) competition, developed by The University of Queensland, challenges students to describe their graduate research in three minutes or less to a general audience using non-specialist terms and only one PowerPoint slide. On May 11, 2017, eight finalists from various academic departments across campus competed in the University of Rochester's 3MT competition. CMSR trainee, Sarah Catheline, won the People's Choice Award for her presentation entitled, "Inhibiting Inflammaging to Treat Osteoarthritis (OA)." Catheline is a Pathology PhD student working in the laboratory of Dr. Jennifer Jonason. Her research focuses on defining the role of the IKK $\beta$ /NF- $\kappa$ B signaling pathway in the onset of osteoarthritis in aging.
