This conference will take place at:

Hilton Garden Inn
74 State Street
Auburn, New York 14830

Who Should Attend
This activity is intended for primary care physicians and mid level providers, internists, family practitioners, pain management physicians, neurologists, neurosurgeons, radiologists and other health care professionals who care for patients with cerebrovascular and neurological disorders.

Objectives
At the conclusion of this activity participants should be able to:

- Identify and describe key risk factors in the treatment of stroke.
- Describe different treatment options for stroke patients.
- Describe the spectrum of treatments including the common antiepileptic drugs and alternative therapies.
- Review the pathophysiology, diagnosis and management of diabetic neuropathy.
- Review updates in MS disease modifying therapies
- Discuss new advances in the multidisciplinary treatment of brain and spine tumors.
- Recognize the gaps in current understanding of neuropathic pain and recognize areas of controversy meriting further research.
