

Culver Voter Registration Flow

General Clinic Flow:

1. There will be posters around the clinic and inside the exam rooms
2. Patients will be asked "Are you registered to vote?" and "Have you completed 2020 Census?" at the entrance along with covid-19 symptom screening
3. As part of the rooming process, our nursing staff will pull up and leave open NYS voter registration website: <https://www.ny.gov/services/register-vote>

For Providers:

1. At the end of the visit, if the patient hasn't registered to vote and you're not running terribly behind the schedule, please help them register. The process generally takes less than 5 minutes. The webpage should already be opened, link above if not.
2. We ask that you use **.CMGVOTE** in the AVS for every encounter. It has been shared with all of you. The phrase has QR codes, phone numbers and relevant information for census completion and voter registration; patients can share with friends/family as well.
