Helping pediatric
patients achieve
their maximum
potential

Pediatric Physical Therapy

MEDICINE of THE HIGHEST ORDER

Helping pediatric patients achieve their maximum potential.

At the Strong Rehabilitation Center, we provide individualized, high quality physical therapy services to our pediatric patients. We treat children from infancy through the teen-age years with acute injuries to long-term conditions. Therapists, children, and parents/caregivers work together in consultation with the child's physician to develop an individualized treatment plan for each child.

Our goal is to help each infant, child, adolescent and teen reach his or her maximum potential.

Pediatric Physical Therapy evaluation and treatment:

- Brachial Plexus Injury
- Brain injuries
- Gross motor and developmental delay
- Neurological disorders
- Orthopedic injuries
- Pre-surgical assessment
- Post Botox injection therapy
- Post-surgical rehabilitation
- Spinal cord injuries
- Torticollis

Treatment program

At the Strong Rehabilitation Center, our pediatric physical therapists provide care through:

- Evaluation and assessment
- Treatments designed to address the patient's specific area of need as well as his or her developmental level
- Individualized exercise programs designed to achieve patient specific goals in a developmentally appropriate manner
- Patient and family education programs
- Collaboration and communication with the child's physician
