ADOLESCENT NICOTINE REPLACEMENT THERAPY TRAINING SERIES

The UR Medicine Recovery Center of Excellence, as part of their Rural Adolescent Vaping Prevention and Cessation Project, has developed a Nicotine Replacement Therapy (NRT) training series. This series consists of four videos* designed to educate clinicians and interested youth partners about using NRT with adolescent patients to help them successfully quit using nicotine.

While this training was designed with medical professionals in mind, it is also appropriate for anyone who wants to know more about treating adolescent vaping in general and, in particular, nicotine replacement therapy!

*Note: There are time requirements on each video page. As such, you'll have to spend the full time of each video on the page before the yellow arrow to proceed to the next page comes up.

It's best to allow about an hour to complete all the videos and survey questions.

[More information and the FULL TRAINING found HERE](#)
