

Referring Patients to NY Quitline (Smoking Cessation)

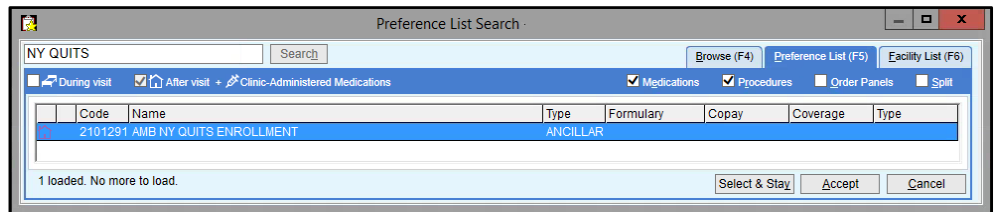

Introduction

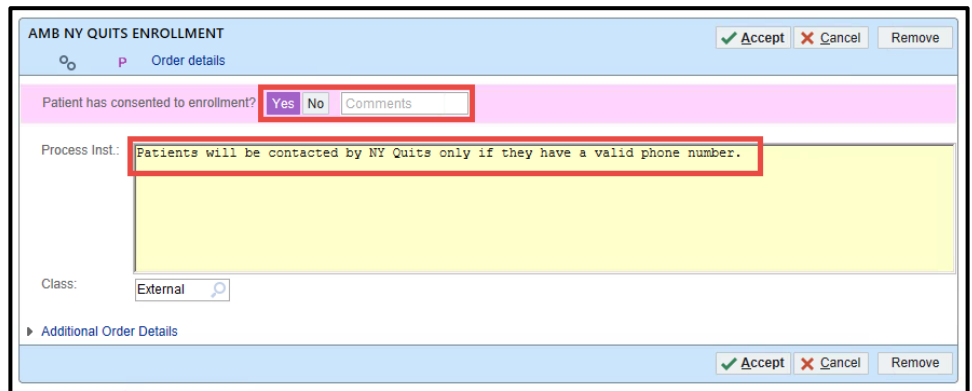

In late 2017, a partnership with Roswell Park Cancer Institute and the Center for a Tobacco-Free Finger Lakes (CTFFL) at URMC was created to enable providers to directly refer patients interested in quitting smoking to the New York State Smoker’s Quitline (NYSSQL) directly via eRecord.

Placing the Order

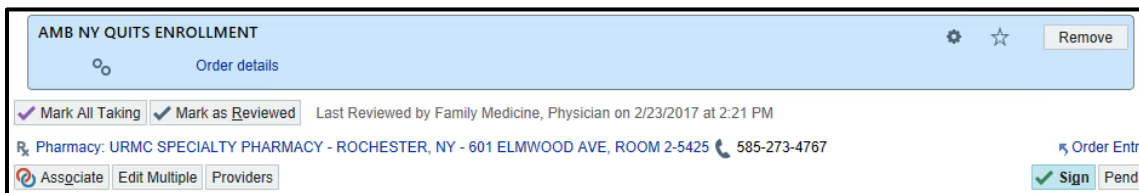

1. Access Medications & Orders, and search for NY Quits.
2. If needed, click the **Preference List** tab, **Facility List** tab, or finally the **Database Lookup** tab.

3. Double-click **AMB NY QUILTS ENROLLMENT** and then click **Accept**.
4. Click **Order details**. The field to the right of **Yes** and **No** is for any Comments.

- **Yes** may already be selected. If not, click **Yes**. Then click **Accept**.
- Note that patients can only be contacted by NY Quits if a valid phone number is provided.

5. Lastly, click **Sign**.

Next Steps

A Batch file containing all referred patients will run nightly and the report will be forwarded to NYSSQL automatically.

Advise the patient that they can expect to be contacted by the NYSSQL within 24-72 hours. The following information appears on the AMB AVS when the order is placed for the encounter:
