

Announcing the availability of our new course –

**High Reliability for Providers:
Avoiding Harm from Diagnostic Error**

**December 7, 2019 (8am-10am; K207 (2-6408))
Or
December 12, 2019 (7am-9am; Class of 62 (G9425))**

This new course will educate providers on the causes of diagnostic failure with a focus on diagnostic error and failure to close the loop on test results. Attendees will learn personal skills and systems to reduce error rates. All of this will be taught within the context of high reliability.

Attendance at this seminar combined with the online Target Zero Harm: High Reliability Essentials activity is a qualifying activity for the URM Malpractice Premium Differential program. Content overlaps with 2018 Risk Management Seminar.

Objectives:

- ✓ **Recognize the “Backstop” program as a type of Patient Safety Net activity.**
- ✓ **Describe and be more aware of cognitive biases that impair accurate diagnosis.**
- ✓ **Determine when to take the time to develop an adequate differential diagnosis.**
