DISCLAIMER FORM FOR RELEASE OF MRI IMAGES

Principal Investigator: [PI's name]

As a participant in this research study, the investigator will provide you with an electronic format image of your brain if you are interested. The images of your brain collected in this study are strictly for research purposes. These images are not intended to reveal any disease state, in part because the protocols used are not optimized for clinical diagnosis. Thus, a certified neuroradiologist will not routinely examine your brain images. These images are not adequate for diagnostic use by your doctor.

However, as stated in the consent form you have already signed, if in the normal course of collecting images of your brain the MR technician or affiliated staff detect what could be a problem, you will be so informed and given referral information so that you can have further diagnostic tests by a certified neuroradiologist.

For more information concerning this research you should contact:
[PI's name, mailing address, telephone and e-mail.]

If you have any questions about your rights as a research subject, you may contact:
