Date: February 16, 2017

The Clinical Flow Cytometry Laboratory will now be performing T Cells and T&B Cells (Lymphocyte Subsets) using Beckman Coulter Aquios CL Instrumentation.

There is no change to sample type of whole blood anticoagulated with EDTA (lavender top).

Minimum sample volume is 750 uL.

There is no change to reference ranges.

Any questions can be directed to Dr. Burack, Maggie Kajstura or Judy Miller by any of the methods listed above.
