E-mail: Melissa_Allen@urmc.rochester.edu

Date: August 3, 2017

Beginning August 7th, and continuing over several weeks, UR Medicine Labs will be upgrading our main automated specimen processing instrumentation. During this time, there may be longer than average turnaround times for routine outpatient work. Inpatient and ED testing will not be affected.

We appreciate your patience as we transition to our new instrumentation and expect workflow to stabilize by mid-September.

For questions, please contact UR Medicine Labs Client Services at (585) 758-0510.
