

# 2025 WRHEPC Health Coalition Emergency Management Seminar Trauma Management for Rural EMS and Community Hospitals Recorded Webinar Series: WRHEPC-TREACH2023-ONLINE

## Overview:

The 2025 Healthcare Coalition Emergency Management Recorded Webinar Series: Trauma Management for Rural EMS And Community Hospitals (T-REACH) is designed to better prepare hospital and non-hospital response partners in planning, mitigating, responding to and recovering from natural and man-made disasters that impact the delivery of health care in a community or impact the environment of care for responders. The goal of the 2025 recorded series/online course is to enhance the skills and knowledge of providers in the rural setting in the management of multi-injured patients and to understand the importance of working as a team of professionals in caring for patients with life-threatening traumatic injuries. Relevant information and stimulated discussions will focus on best practices in the management of trauma/disaster patients.

## Objectives:

- Discuss disaster triage principles and appropriate destination decisions through case study review
- Identify the various injury patterns and signs of shock that present in different patient populations
- Manage interventions appropriate to treat spinal trauma and burns prior to arrival at a trauma center
- Examine risks for post traumatic injury and resources available to support patients after discharge

## Target Audience:

This recorded webinar series is targeted to Healthcare professionals (MD/DO, PA, NP, RN, EMS providers and other allied medical professionals) in rural settings caring for trauma patients (ED, Acute Floor, ICU and EMS) in New York State.

## Trauma REACH 2025 Website:

Visit the website for speaker bios, topic objectives and handouts for each topic/module.
