

Neuropsychology Service

University of Rochester Medical Center
Department of Physical Medicine & Rehabilitation

Outpatient Neuropsychology Service:

The Outpatient NP Service at URMCC specializes in the provision of neuropsychological evaluation of patients suspected of having cognitive impairment associated with neurological conditions affecting the brain. Our team is also skilled in the field of rehab/health psychology and provides neuropsychological care to patients and families facing chronic and/or new onset health conditions and trauma.

Utility of a Neuropsychological Evaluation:

- Assess presence & nature of cognitive impairment
- Provide differential diagnosis
- Determine baseline level that allows for comparison of cognitive functioning over time
- Explain the functional impact of brain dysfunction on everyday life
- Recommend appropriate treatment planning and individualized recommendations

Our Team:

Amy Pacos Martinez, Psy.D.
Clinical Neuropsychologist

Timea Tozser, MA
Psychometrist

Who Could Benefit From A Neuropsychological Evaluation?

If your patient is 18 years or older and has an acquired cognitive deficits due to a neurological or medical condition, he or she may benefit from an evaluation with our team. We work with many types of brain based disorders such as:

- Stroke
- Brain tumor, aneurysm or hemorrhage
- Traumatic brain injury
- Dementia (or question of dementia)
- Multiple sclerosis
- Chronic pain
- Sleep disorders

Types of Evaluations Offered:

- Comprehensive Neuropsychological Evaluations
- Brief Neuropsychological Consultation
- Pre Surgical Evaluations

Our Evaluation Process:

- Session 1: Clinical interview and record review with Neuropsychologist
- Session 2: Testing appointment with Psychometrist
- Session 3: Interpretive feedback session with Neuropsychologist

Location:

Clinton Crossings Office Park
4901 Lac De Ville Boulevard
Building D, Suite 250
