ResponseWare® is the digital version of the clickers. It is both an app (iPhone, iPad and Android) and a web-based format of responding to polling questions that are developed using TurningPoint software.

ResponseWare on the web

Rwpoll.com

Students do not need accounts to join a session. They just need to enter the session ID provided by the instructor and then click on Join Session.
Tap the app to launch it. Your screen will look like this:

Your Account
You will not need an account and therefore will not need to login. URMC has purchased the ResponseWare® licenses.

Your Identity
Enter your first and last name only if your instructor tells you to do so. Most of the faculty use ResponseWare® for anonymous polling.

Join a Session
Your instructor will give you the 6-digit Session ID number at the start of the lecture. Enter the number and tap Join.

If your screen looks like this, press the 2X button in the lower right corner to enlarge the view.
