I hereby give my consent and authorize

(What list of possible assistants, all of whom are credentialed to provide surgical services at the hospital, is available)

to treat the following conditions:
Cardiomyopathy and Heart Failure

by performing the following procedure(s):
Right Heart and Pulmonary Artery Catheterization (placing a thin hollow-tube catheter into a large vein and advancing it through the heart and lung.

1. The care provider has explained my condition to me, the benefits of having the above treatment procedure, and alternate ways of treating my condition. I understand that no guarantees have been made to me about the result of the treatment. The alternatives to this procedure include:
   Physical examination only. Echocardiogram testing

2. The care provider has discussed with me the reasonably foreseeable risks of the treatment and that there may be undesirable results. The risks that are specifically related to this procedure include:
   Bleeding, infection, paralysis or anesthesia complications, failure of or damage to any organ system including heart, lung, liver, kidney, eyes or brain, pneumothorax ("dropped lung"), death

3. I understand that during the treatment a condition may be discovered which was not known about before the treatment started. Therefore, I authorize the care provider to perform any additional or different treatment which is thought necessary and available.

4. I consent to the administration of local, regional or general anesthesia and/or sedation as deemed most appropriate for the procedure to be performed. (The list of possible anesthesia providers, all of whom are credentialed to provide anesthesia at this hospital, is available).

5. Any tissue, parts, or substances removed during the procedure may be retained or disposed of in accordance with customary scientific, educational and clinical practice.

6. At the discretion of the doctor I consent to the presence of manufacturer's representatives to aid in the service and correct calibration of the correct instrumentation. I understand that at no time will these representatives actively participate in my procedure.
CONSENT FOR RIGHT HEART & PULMONARY ARTERY CATHETERIZATION

Relationship to the Patient

Complete this section for all OR procedures and all other invasive internal procedures performed in any setting.

8. Consent for Receipt of Tissue(s):
   □ yes (please list), ____________________________
   □ not expected to be needed, but may be required and given in an emergency
   □ refused
   □ n/a

9. Consent for Blood Transfusion:
   □ yes
   □ not expected to be needed, but may be required and given in an emergency
   □ refused. Refer to SMH Policy 9.18 (Refusal of Blood (or Blood Products) Transfusions or HH Policy 4.1 (Blood Transfusion-Refusal to Permit).
   □ n/a

For those procedures that have the potential for significant blood loss, I consent to the transfusion of blood or blood components that may be necessary before, during or after the procedure. I have been informed that no transfusion is 100% safe, however present testing methods make the risks of infection very small. Risks include infection from viruses, bacteria, or parasites, including but not limited to HIV (the AIDS virus) and hepatitis, as well as fever, chills, allergy, volume overload, or death. I have discussed possible alternatives with my care provider, including no transfusion, autologous transfusion (donation of my own blood), designated/directed donor transfusion (collection of blood from donors selected by me) or blood salvage during the procedure. I understand that these alternatives may not be available due to timing or health reasons, and the above risks may still apply.

10. Patient Consent for Blood/Tissue: I have had a chance to discuss the risks, benefits and alternatives regarding transfusion/receipt of tissue (as above) with my healthcare provider. My decision(s) regarding the transfusion of blood or blood components and/or the receipt of tissue are as above. I understand this covers my perioperative/periprocedural (before, during, and after the surgery/procedure) course of treatment.

ATTESTATION

I have discussed the planned procedure, including the potential for any transfusion of blood products or receipt of tissue as necessary, expected benefits, the potential complications and risks and possible alternatives and their benefits and risks with the patient or the patient's surrogate. In my opinion, the patient or the patient's surrogate understands the proposed procedure, its risks, benefits, and alternatives.
