

Help us improve oral health care for people with developmental disabilities Did you know that dental care is one of the most pressing healthcare needs among people with developmental disabilities? The Golisano Foundation and Eastman Dental have formed a task force of community leaders and experts to seek reliable data and engage the community to help. Family members, caregivers, group home staff, medical and dental providers are encouraged to visit www.urmc.rochester.edu/dentistry/developmental-disabilities/ to provide input, and join the discussion about how to improve oral health care for people with developmental disabilities. Time is limited for this project, please visit today!
