

Dear Patient:

As part of your standard of care, your provider may suggest that you have a special diagnostic test at today's visit.

The Diagnostic Testing Service is operated by Strong Memorial Hospital and therefore any testing performed will be billed out separately from the visit with your provider. The hospital will bill you or your insurance company directly for tests performed.

Any co-pays paid for services today will be applied for fees associated with the physician or optometrist services. Any bills received from the Flaum Eye Institute will be applied for physician/optometrist services and interpretation of testing results.
