

Department of Imaging Sciences Stanley M. Rogoff Lecture

“Children's Chest Disease: A Dozen Abnormalities to Identify”

Objectives: At the completion of this learning activity, you will be able to identify the imaging of infection and congenital anomalies that become infected. Compare the appearances of air in the wrong place in the chest. Solve problems related to the imaging of the chest in children.

Presented by

Beverly P. Wood, M.D., M.Sc.Ed., Ph.D.

Professor Emerita, Departments of Radiology and Pediatrics,
Division of Medical Education, Keck School of Medicine,
University of Southern California, Los Angeles, CA

Dr. Wood is professor of pediatrics, medical education and radiology at the University of Southern California, Keck School of Medicine, where she is active in the development of distance learning programs. Dr. Wood is also professor of radiology at Loma Linda University. She is an AJR section editor and an active member of AAP, serving on many committees. Dr. Wood has played a key role in the development and design of the certificate of added qualification and recertification exams in pediatric radiology. She is 1996 recipient of the Gold Medal of the Society for Pediatric Radiology and a 2004 Gold Medalists of the American Roentgen Ray Society.
