Thank you for choosing UR Imaging. We look forward to serving your medical needs.

An **Ultrasound** scan is a diagnostic imaging procedure that uses a combination of sound waves and computer technology to see inside the body. It is used to study parts of the body such as the liver, testicles, uterus and other organs. The exam is performed to look at the size of the organs and any abnormalities within them. Ultrasound can also be used to study blood vessels in organs as well as in the neck, arms, and legs.

Ultrasound generally involves little or no discomfort as it is non-invasive and does not use radiation. There are no known side effects.

**IMPORTANT INFORMATION:** If you need to cancel or reschedule your appointment, please provide 24 hours notice.

**Instructions for the day of your scan:**
- Leave valuables at home.
- Bring your insurance card and photo ID.
- A parent/guardian should remain in the building when a child (under 19 years) is having an imaging procedure.

**Some Ultrasound exams require preparation:**

- **Renal Ultrasound:** This evaluates the kidneys, bladder and in adults, the abdominal aorta.
  
  **Preparation:**
  - 0–16 years old – no preparation required.
  - 17 years and older –
    - For morning appointments, nothing to eat or drink after midnight, medication can be taken with water.
    - For afternoon appointments, nothing to eat or drink 6–8 hours prior to your examination time, medication can be taken with water.

- **Abdomen/Aorta Ultrasound:** This evaluates the liver, gallbladder, pancreas, both kidneys, the spleen, and the abdominal aorta.
  
  **Preparation:**
  - 0–3 years old – withhold the last scheduled feeding prior to exam time.
  - 4–16 years old – nothing to eat or drink 4 hours prior to exam time.
  - 17 years and older –
    - For morning appointments; nothing to eat or drink after midnight, medication can be taken with water.
    - For afternoon appointments; nothing to eat or drink 6–8 hours prior to your examination time, medication can be taken with water.

- **Pelvic Ultrasound:** This evaluates the uterus and ovaries.
  
  **Preparation:**
  - 0–3 years old – withhold the last scheduled feeding prior to exam time.
  - 4–11 years old – nothing to eat or drink 4 hours prior to exam time.
  - 12 years and older – start drinking 24–32 oz. of water (no carbonation) one hour before arriving for exam; arrive with a full bladder. Do not urinate.
  - 17 years and older – start drinking 24–32 oz. of water (no carbonation) one hour before arriving for exam; arrive with a full bladder. Do not urinate.

**What to expect during your procedure:**

- You will be positioned on an exam table and warm gel will be applied to the area being examined. The transducer (camera) is placed on the skin and passed over the area being examined.
- Depending on the area being examined, you may have to stay still, change positions, or hold your breath. Most exams take between 15 and 45 minutes, some may take an hour.

Your results will be sent to your referring physician within 2 business days.
