The Plate Method is a simple way to plan meals for you and your family. You don’t have to count anything or read long lists of foods. All you need is a 9-inch plate.
Let’s Plan Your Meal

**Breakfast**

- Whole grain has more fiber and more nutrients.
- Low-fat proteins are better for your heart and waistline. Add a small piece of fruit or leave empty.
- Low-fat or natural peanut butter
- Cold Cereal
- Oatmeal
- Bread
- 1% Milk
- Low-fat Yogurt
- Egg
- Cottage Cheese
- Apple
- Orange

**Lunch/Dinner**

- Some vegetables are higher in starch (corn, peas, yams) and belong on this part of the plate.
- Fill half your plate with more than one vegetable, so you won’t get tired of your favorites.
- Bake, broil, boil or steam your protein instead of frying.
- Brown Rice
- Peas
- Corn
- Potatoes
- Broccoli
- Okra
- Lettuce
- Carrots
- Green Beans
- Beef
- Chicken
- Fish

**Note:** Only use 1/2 of your plate — 1/4 protein and 1/4 starch
