

Concussion Injury Prevention and ImPACT Testing

Immediate Post-Concussion Assessment and Cognitive Testing (ImPACT) is the most widely used and most scientifically validated computerized concussion evaluation system. ImPACT provides trained clinicians with neurocognitive assessment tools and services that have been medically accepted as state-of-the-art best practices for making safe return-to-play decisions.

WHAT IS THE PURPOSE OF THE TEST?

ImPACT assists health care professionals track the recovery of cognitive processes following concussion. It also helps doctors communicate post-concussion status to athletes, coaches, parents, and clinicians. Using ImPACT, health care professionals and educators are better equipped to make decisions about an athlete's academic needs following concussion.
