**RE:** Serum Ketone Analysis Unavailable

**DATE:** February 10, 2012

Dear Clients of URMC Laboratories,

I am writing to inform you that the URMC Clinical Laboratory is no longer able to provide serum ketone Acetest analysis, due to a manufacturing problem. The Acetest tablets required for this testing are currently unavailable and there is no other supplier for this product. Therefore, the test won't be orderable in eRecord or the Laboratory Information System. This change will be effective immediately.

During the interim, a possible alternative is the urine ketone test which is available as part of the Urinalysis panel.

We apologize for the inconvenience. If there are any questions, please contact an Automated Laboratory Chemistry Supervisor at 275-7803.

Best regards,

Yan Zhang, Ph.D.  
Associate Director of Automated Laboratory
