

Beta-Blockers

Metoprolol (Toprol XL, Lopressor), Atenolol (Tenormin), Carvedilol (Coreg)

Use:

- These medications may be used to control blood pressure or heart rate. They may also be used to help a weak heart, or after a heart attack to avoid future attacks.
- Take these medications with food

Possible side effects you may experience include:

- Low blood pressure, low heart rate, dizziness, fatigue, diarrhea, rash.
- Take time to move from lying down or sitting to standing up to make sure you are not dizzy or light headed and can walk safely without falling down.
- **Please contact us or your PCP if you feel faint or dizzy, or your heart beat does not feel normal.**

This is a brief summary of your medication.

Please contact us or speak to a pharmacist if you have more questions.
