

## Laboratory for Behavioral Health Skills Project Proposal

Date:

Name:

Education program:

Email:

Partners/collaborators:

**Project lead:** What is your role and the roles of collaborators? How does your project align with your career goals?

**Problem/Background & Significance:** What is the skill/competency problem your project will address? Provide a brief background and the significance of its focus, and how it is embedded in current training and education efforts.

**Aims:** What is the specific aim and of your project? Who are the learners and how many will be involved in what timeframe (consider a milestone table)?

**Methods:** What specific methods/procedures do you propose? (i.e., standardize patient actors' age etc, feedback, recording/upload and time required in lab).

**Evaluation and dissemination:** What measures do you propose /for what purpose and outcomes? What dissemination plans do you have? If successful, what will change or new practice will result? Who else will benefit?

**Resources/ Budget:** What resources do you bring to the project? What else is necessary in terms of budget? (note: FTE is not provided)
